Summary

The report "Fixed or mobile WiMAX? Forecasts and assessment for the transition from 802.16-2004 to 802.16e WiMAX" presents an in-depth analysis of the market dynamics for the two versions of WiMAX, and for both fixed and mobile services.

The availability of two, mutually incompatible, versions of WiMAX creates a challenge for everybody in the industry, trying to understand how they will fare in the market, which one will dominate in the long term and which services they will support. 802.16-2004 WiMAX only supports fixed access, but products are already available.

802.16e WiMAX supports mobile and fixed access but products are still at least a year away. Vendors need to understand what demand there is for these two technologies in order to refine their product roadmaps. Service providers want to understand which technology best meets their requirements and will enjoy long-term support from vendors.

The report addresses these issues and in addition it provides an extensive overview of WiMAX technology, competing technologies, regulation, and business models. It gives a very detailed forecast of subscribers, service revenues and equipment revenues for 15 countries, 6 regions and for the worldwide market.

Topics covered:

- The differences between 802.16-2004 and 802.16e in terms of functionality, performance, services supported, target market segments and regulatory implications.
- The market dynamics for fixed and mobile WiMAX access in different regions and different market segments.
- WiMAX technology.
- Standardization efforts.
- The role of the WiMAX Forum and its certification program for interoperability.
- Upgrade paths to 802.16e WiMAX for service providers using 802.16-2004 WiMAX or proprietary solutions.
- Competition from wired technologies (DSL, cable modem, fiber-to-the-home) and from wireless technologies (Wi-Fi, 3G including WCDMA, HSDPA, EV-DO, TD-CDMA, and proprietary solutions like Qualcomm's FLASH-OFDM).
- Timeline for WiMAX product availability.
- Spectrum availability and regulatory impact on WiMAX deployments.
- WiMAX fixed and mobile services and applications.

- Comparison of the WiMAX opportunity for service providers in the residential and business, rural and metropolitan, emerging and developed markets, as well as municipal networks.
- Vendors' perspective on the development of the WiMAX market and their product strategy for transitioning current customers to 802.16e WiMAX.
- Profiles of 23 major vendors.
- Drivers towards adoption of WiMAX, deployment timeline, services offered and market size in the largest markets worldwide.

Extensive forecast (2006–2010) of WiMAX demand, service revenues and equipment revenues

The forecast presents data at the global, regional and country level as shown below.

Regions

- North America
- Latin America
- Western Europe
- Eastern Europe
- Asia Pacific
- Rest of the World

Countries

Argentina	Italy
Australia	Japan
Brazil	Korea
Canada	Mexico
China	Spain
France	UK
Germany	USA
India	

For each market, the forecast includes:

- Fixed and mobile broadband subscribers
- Fixed and mobile WiMAX subscribers
- Data and VoIP service revenues
- Data revenues by market segment
- Residential, business and mobile ARPU
- Equipment revenues.

Companies mentioned

O2	Huawei	Runcom
Access Telecom	Iberbanda	Samsung
ADP Telecom	Iliad	Samsung Venture Investment Corporation
Afribone Mali	InfiNet Wireless	SBC
Airspan	Intel	SEQUANS Communications
Alcatel	Intel Capital	Sequoia Capital
Altitude	IntroWeb	Siemens Mobile
Altitude Telecom	Inukshuk	SiGe Semiconductor
Alvarion	IP Wireless	Singtel
Aperto	Irish Broadband	SK Telecom
ArrayComm	JStream Technologies	SkyPilot
AT&T	Korea Telecom	Smart
Axtel	KT	SOMA Networks
Axxcelera Broadband Wireless	KTB Ventures	Speakeasy
Beceem	Libera	Sprint Nextel
BelAir	Link 3	SR Technologies
Bell Canada	Lucent	Telabria
BellSouth	Marconi	TeleCis Wireless
Biva	MiTAC	Telkom SA
Brasil Telecom	Motorola	Telmex
BT	MVS Comunicaciones	Terabeam
Cambridge Broadband	Navini	Time
Clearwire	Netia	Time Warner Cable
Dedicado	Nex-G	T-Mobile
Delta Networks	Nextel	TowerStream
Deutsche Telekom	NextNet	UHT
Digitel	NextWeb/Covad	UK Broadband
Digiweb	Nortel	Ultranet
EarthLink	Orange	Unwired
Enertel	picoChip	VCom
Entel	Pipex	Walden International
Ericsson	Protel	WaveIP
Ertach	Proxim	WaveRider
FarmTel	Qualcomm	Wavesat
Flarion	Quantum Broadband	Whoosh Wireless
France Telecom	Solutions	Wi-LAN
Fujitsu	Qwest	WiMAX Telecom
GemTek Technology	Radionet	Yozan
Global Catalyst Partners	Redline	Z-Com
Hanaro	Reliance Infocomm	ZTE
Hopling Technologies	Rogers Communications	

About Senza Fili Consulting

Senza Fili Consulting provides advisory support on wireless data technologies and services. Our expertise extends to cellular communications, WiMAX, Wi-Fi, and other fixed and mobile Broadband Wireless Access (BWA) technologies. We assist vendors in gaining a better understanding of the service provider and end-user markets. We work alongside service providers in developing a wireless data strategy and gaining a better understanding of the demand for wireless services. Independent advice, a strong quantitative backing, and an international perspective are the hallmarks of our work.

At Senza Fili we have in-depth expertise in financial modeling, market forecasts and research, white paper preparation, business plan support, due diligence, training, and evaluation of end-user requirements. Our clients are international and span the entire value chain: they include fixed and mobile operators, ISPs, wireless ISPs, other service providers, vendors, solution providers, system integrators, investors, and industry associations.

For additional information you can visit us at www.senzafiliconsulting.com, or you can contact us at info@senzafiliconsulting.com or at +1 425 657 4991.

About the Author

Monica Paolini is the founder and president of Senza Fili Consulting. She is a well-known expert in wireless data technologies such as WiMAX, WCDMA, HSDPA, EV-DO, Wi-Fi and other 3G and fixed proprietary technologies. She has a PhD in Cognitive Science from the University of California, San Diego (USA), an MBA from the University of Oxford (UK), and a BA/MA in Philosophy from the University of Bologna (Italy). She can be contacted at monica.paolini@senzafiliconsulting.com.

Table of contents

Executive Summary

1 Fixed and mobile WiMAX: two technologies and two markets?

- 1.1 Why a mobile WiMAX?
- 1.2 802.16–2004 WiMAX: dead on arrival?
- 1.3 A transition to mobility through portability
- 1.4 Report roadmap

2 A comparison between 802.16–2004 and 802.16e WiMAX

- 2.1 The difference between 802.16 and WiMAX
- 2.2 Standardization efforts at the IEEE
 - 2.2.1 The IEEE 802.16 standard
 - 2.2.2 802.16–2004: the basis for WiMAX for fixed services
 - 2.2.3 802.16e: the amendment that supports mobility
 - 2.2.4 Handoffs and interworking
 - 2.2.5 Further requirements for mobility not included in the IEEE standard
- 2.3 Technology overview
 - 2.3.1 System and certification profiles
 - 2.3.2 What is WiMAX? System profiles for 802.16–2004 and 802.16e WiMAX
 - 2.3.3 OFDM
 - 2.3.4 OFDMA and SOFDMA
 - 2.3.5 Why isn't 802.16e WiMAX backwards-compatible with 802.16–2004 WiMAX?
 - 2.3.6 Duplexing: TDD and FDD
 - 2.3.7 Adaptive Modulation Coding (AMC)
 - 2.3.8 Maximum and expected, real-life throughput and range
 - 2.3.9 Reuse factor
 - 2.3.10 Security
 - 2.3.11 QoS
 - 2.3.12 Multiple antenna technologies: STC, MIMO, and AAS
- 2.4 The WiMAX Forum
 - 2.4.1 The role of the WiMAX Forum
 - 2.4.2 The need for certification: isn't a standard enough?
 - 2.4.3 The WiMAX Forum certification program
 - 2.4.4 WiMAX certification profiles
 - 2.4.5 WiMAX certification waves
- 2.5 WiBRO
- 2.6 Upgrade paths to portability and mobility
 - 2.6.1 The need for a smooth transition
 - 2.6.2 Different transition paths
 - 2.6.3 Who needs to upgrade?

3 Competing technologies

- 3.1 DSL, cable modem and other fixed technologies
- 3.2 Wi-Fi
 - 3.2.1 The public access hotspot market
 - 3.2.2 The last mile market
- 3.3 3G technologies: EV-DO, WCDMA/HSDPA and TD-CDMA
 - 3.3.1 Will WiMAX be faster than 3G?
 - 3.3.2 ...or will it be cheaper?
 - 3.3.3 Friends or foes?
 - 3.3.4 IP Wireless TD-CDMA
- 3.4 Qualcomm's FLASH-OFDM
- 3.5 Pre-WiMAX proprietary technologies
- 3.6 Where does WiMAX fit?

4 Business models for fixed and mobile services

- 4.1 Product timeline
- 4.2 Spectrum availability and regulation
 - 4.2.1 Choosing a spectrum band
 - 4.2.2 Licensed or license-exempt spectrum?
 - 4.2.3 Worldwide spectrum availability
- 4.3 Services and applications
- 4.4 A facilities-based approach to last mile connectivity
- 4.5 Fixed, portable or mobile?
- 4.6 Business and residential market segments
- 4.7 Rural and metropolitan markets
- 4.8 Municipal networks
- 4.9 Developed and emerging markets

5 The vendors' perspective

- 5.1 Chipset manufacturers
 - 5.1.1 Beceem
 - 5.1.2 Fujitsu
 - 5.1.3 Intel
 - 5.1.4 picoChip
 - 5.1.5 TeleCIS Wireless
 - 5.1.6 SEQUANS Communications
 - 5.1.7 Runcom
 - 5.1.8 Wavesat
- 5.2 WiMAX vendors
 - 5.2.1 Airspan
 - 5.2.2 Alcatel
 - 5.2.3 Alvarion
 - 5.2.4 Aperto Networks
 - 5.2.5 Motorola

- 5.2.6 Navini Networks
- 5.2.7 NextNet
- 5.2.8 Nortel
- 5.2.9 Proxim Wireless
- 5.2.10 Redline Communications
- 5.2.11 Samsung
- 5.2.12 Siemens
- 5.2.13 SOMA Networks
- 5.2.14 SkyPilot Networks
- 5.2.15 SR Telecom

6 Worldwide demand for 802.16–2004 and 802.16e WiMAX

- 6.1 Scope and methodology
- 6.2 Fixed and mobile broadband forecast
 - 6.2.1 Fixed broadband
 - 6.2.2 Mobile broadband
- 6.3 Global WiMAX forecast
 - 6.3.1 Subscribers
 - 6.3.2 Service revenues from data and VoIP
 - 6.3.3 Equipment revenues
- 6.4 North America
 - 6.4.1 United States
 - 6.4.2 Canada
- 6.5 Latin America
 - 6.5.1 Brazil
 - 6.5.2 Mexico
 - 6.5.3 Argentina
- 6.6 Western Europe
 - 6.6.1 Germany
 - 6.6.2 UK
 - 6.6.3 France
 - 6.6.4 Italy
 - 6.6.5 Spain
- 6.7 Eastern Europe
- 6.8 Asia Pacific
 - 6.8.1 China
 - 6.8.2 Japan
 - 6.8.3 Korea
 - 6.8.4 India
 - 6.8.5 Australia

6.9 Rest of the World

Ordering information

The report can be purchased online at www.senzafiliconsulting.com, where a digital version in PDF can be immediately downloaded. You can also order the report by sending us the order form on the next page by fax or mail.

Pricing information is shown on the next page. When you purchase the report, you get a free one-hour talk with the author of the report. This will give you the opportunity to ask any questions you may have about the report findings and methodology or to discuss related topics.

If you have any questions, please do not hesitate to contact us at +1 425 657 4991 or at sales@senzafiliconsulting.com.

Senza Fili Consulting Order Form

Publication: **Fixed or mobile WiMAX? Forecasts and a sseessment for the transition from 802.16-2004 to 802.16e WiMAX**

If you would like to order our report **Fixed or mobile WiMAX? Forecasts and assessment for the transition from 802.16-2004 to 802.16e WiMAX**, please fill out this this form and send it to us.

1. Enter your contact information	2. Choose your order option
